Before You Start

1. Install the Sentinel IoT app.
2. Have your email address ready.
3. Keep your device QR code or IMEI number available.
4. Enable location and other requested permissions.

What You'll Do

Download App → Register Account → Add Device → Create Geo-Fence

You can add a device by scanning the product QR code or entering the IMEI manually.

Helpful Tips & Support

- Keep your device charged and active.
- Allow app permissions when prompted.
- Use the product QR code or IMEI to add a device.
- Check that your geo-fence is saved and linked to the correct device.

Quick Checklist

- [ ] Download app
- [ ] Register account
- [ ] Add device
- [ ] Create geo-fence
